### Executive Summary

Darren Hulem has more than six years of experience in technology infrastructure, providing supervision, architecture, deployment and upgrading of company computer network systems including hardware, software, servers and mobile devices. As a certified IT professional, he performs both on and off-site testing and set-up as well as monitoring existing technology to determine future network needs. He interacts with staff and management to ensure the efficient application of upgrades and implementation of overall system improvements.

Before coming to GRF, Mr. Hulem worked as a System Engineer at Network Depot and an Applications Analyst for Ricoh USA. He is proficient at assessing and resolving technical and staff needs and provides the comprehensive IT support services necessary to maintain a functional and professional work environment.
