#### What are the top 5 risks your organization will face 3 years from now?

## **Artificial Intelligence**

Generative Al is an umbrella term that refers to artificial intelligence models that have the capability to generate content. Generative AI can generate text, code, images, video, and music.

Large language models (LLMs) are a type of generative AI that are trained on text and produce text content. ChatGPT is a popular example of generative text AI. All large language models are generative AI.
